

SSANGYONG

REXTON II

Power Enhanced Beauty

SsangYong is a specialist manufacturer in 4x4s, SUVs and MPVs. Our forte is combining unique design, powerful engines and affordability. The Rexton II continues this philosophy and expands its proposition with an all new look inside and out. The new sophisticated interior now compliments the advanced technology that enables the Rexton II to go anywhere in style.

Stunning from all angles

The Rexton II stands apart with its stunning good looks, beginning with SsangYong's trademark grille, unique character lines and projection head lamps, with powerful performance to match its sophisticated appearance. Add the simple yet refined tail lamp assembly and you've got a perfectly balanced design that states you're driving something truly special.

Inside the 7 seater Rexton II everything is elegantly designed around you. The black tone interior and new look instrument panel enhance the feeling of luxury and sophistication.

A control panel on the driver's door allows convenient control of all windows and doors, a CD Player and Radio along with steering wheel controls, cup holders and lots of clever storage compartments are just some of the features. For all Rexton II passengers the cabin temperature is automatically maintained by climate controlled air conditioning.

Models shown may include optional extras.
Stereo units may vary.

7 Seats as standard

Bask in comfort

The New Rexton II is one of few 4x4s on the Irish market that has seven seats as standard and therefore offers much more space and versatility. The roomy interior is dominated by rich black tones. The overall effect is both soothing and elegant, making every drive in the Rexton II a special experience.

3-person memory driver's seat*

The memory profile system allows up to three different drivers to input their preferred settings for the various seat positions and outside mirror angle. This provides greater comfort and convenience when the vehicle is frequently operated by more than one person.

Powered seats*

The driver's seat power-adjusts eight ways (height up or down, position forward or backward, seat pitch and seatback pitch), while the front passenger's seat is powered to adjust four ways.

Heated seats*

The front seats are heated, and you have five different temperature settings from which to choose.

Tilting Headrests*

The tilt of the front headrests adjust for optimal seated comfort and help relieve fatigue for both the driver and front passenger.

*Only available on 186bhp Sports model

One vehicle, multiple roles

A spacious cargo bay and seating flexibility boost Rexton II's versatility as a people carrier, a business vehicle and a leisure SUV.

The 7 seater Rexton II is loaded with innovative features and functions to enhance utility and convenience. For example, the flip up rear window* can be popped up to let you quickly and easily put items in the boot or take them out without opening the tailgate. The 60/40 split second-row seats can be laid flat to accommodate long items and a luggage net in the boot neatly secures the cargo.

Normal seating

With 7 Seats as standard, the Rexton II has the flexibility to carry up to 7 passengers comfortably.

Third row flat Second row 40% flat

There are several ways to use the space to carry passengers or luggage.

Second & third row folded flat

Provides the cargo space of a minivan.

01 3rd row 60 % flat

02 Flip up rear window*

03 Luggage net

*Only available on 186bhp Sports Model

Access all areas

Roam freely and confidently with your family in the robust and rugged Rexton II. You can go more places in comfort and rest assured that you'll return home safe and sound.

T-Tronic 5 speed automatic transmission with FI style manual shift feature

The transmission system comes with SsangYong's innovative gear and steering wheel-mounted shift buttons. Advanced programs monitor and "remember" the driver's gear shifting habits and determine the shift points for optimal smoothness and fuel efficiency. The transmission is linked directly to the engine via a lock-up torque converter, minimising energy loss for even greater fuel savings. T-Tronic also comes with Winter Mode, allowing you to start out or back up in second gear to prevent slipping on snow or ice.

Double Wishbone Front Suspension

The front wheels are suspended by lower and upper arms to maintain optimal wheel contact for better driving stability. Drive smoothness is further enhanced by dual action gas-filled shock absorbers, stabiliser bar and coil springs.

Towing the line

The Rexton II enables you to indulge your passion with a massive 3.2 tonne towing capability (braked trailer). Now you can plan those trips with the knowledge that the Rexton II will get you there safely and effortlessly.

Our highly reliable and durable Diesel power plant

The SsangYong 270XDi diesel engine with sophisticated 3rd-generation common rail fuel injection system cranks out 165bhp (186bhp in the sports model), that boosts power and fuel efficiency for a cleaner, more economical operation. Maximum torque is delivered over virtually the entire rpm range, providing quick engine response and outstanding acceleration when overtaking.

Two great drivelines to enhance driving safety

Your driveline options include Torque on Demand (TOD) or All Wheel Drive (AWD 186 BHP).

Permanent All Wheel Drive (AWD)

All Wheel Drive is available on the 186bhp model while the other versions have Torque on Demand (TOD). With the enhanced output of the Sports model, power is distributed constantly to all four wheels for quick acceleration and greater responsiveness. If slippage is detected the power is immediately transferred through the Electronic Stability Program (ESP) to the wheel with the greatest grip ensuring optimal stability and safety at all times.

Torque on Demand (TOD)

Featuring TOD, an electronic torque management system that controls the distribution of power according to driving conditions. Under normal road conditions the TOD system applies maximum torque to the rear wheels, effectively now Rexton II is in 2WD allowing for maximum fuel efficiency. If any rear wheel slippage is detected, TOD immediately and automatically transfers exactly the right proportion of power to the front wheels. This along with TCS (Traction Control System) allows power to be perfectly distributed for optimum directional stability.

Prepared to protect

In advance of its impressive aesthetics and comforts, Rexton II has been designed to withstand impacts and disperse impact force efficiently and effectively. The front-row seats are protected by frontal airbags and supplemental side-impact airbags.

ESP Electronic Stability Program

Preventing under-steering or over-steering accidents

The electronic stability program monitors road conditions and vehicular status constantly, adjusting engine output and braking whenever the driver is about to lose control.

Preventing a rollover

ESP integrates the anti lock brake system (ABS), active rollover protection (ARP), anti-slip regulation (ASR) and brake-force assist to improve Rexton II's intervention capabilities.

HDC Hill Descent Control

Negotiating steep gradients most safely

The HDC takes over braking duties and maintains a slow, steady pace down gradients of 10% or more. All you have to do is focus on steering.

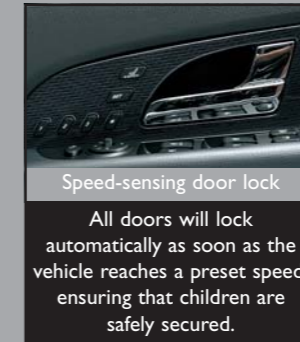

Solid reinforcement

The ultra-rigid frame features triple-layer construction which is built to absorb and disperse shocks and impacts of all kinds. This means less vibration during normal operation, longer durability and greater safety in a collision.

Safety belt pretensioner and load limiter

The safety belt tightens for a brief instant at the moment when an accident begins, ensuring that the occupant is kept securely in place before the airbag deploys. The restraining force of the safety belt lessens gradually as the occupant moves forward into the airbag.

Speed-sensing door lock

All doors will lock automatically as soon as the vehicle reaches a preset speed, ensuring that children are safely secured.

Door impact bar

Ultra-high tensile strength steel bars have been inserted in the doors to help keep the cabin intact during a collision.

The Rexton II offers many extras that add up to a big difference in how you feel about your SUV.

Roof rails

Enables SsangYong accessories to be fixed to the roof.

In-glass antenna

Enhances exterior appearance and provides great radio reception.

Electrically adjustable and heated door mirrors

Remain clear on cold wet days, aids rear visibility

Wiper deicer in front

Front glass includes heating coil to ensure wipers stay unstuck on wintry days

Cup holders in front

Retractable dual cup holders and centre console cup holders

Centre console

Serves as armrest and handy storage compartment

Flip-up rear window*

An easy way to access the boot without opening the tailgate

Rear air spoiler*

Both functional and sporty, helps stabilise the vehicle

Safety power window

Stops closing and reopens automatically if obstructed by an object

3 power outlets

Offers all occupants a convenient way to recharge handheld electronics

Seatback pockets

A handy place to put magazines and other reading material

Cup holders in 2nd row

Holds two drinks securely for passengers in the rear

Side pockets in doors and door courtesy lamp

Increases interior storage space and alerts other drivers when a door is open.

Cruise control**

Helps save fuel and takes the stress out of driving long distances

Tiltable steering wheel

Steering wheel can be easily adjusted to accommodate individual drivers.

Automatic air conditioning with AQS

A handy option that includes air filter system to ensure cabin climate quality

Sun visors

Include retractable extenders for greater sun-blocking coverage; illuminated vanity mirror on each one.

High-brightness LED black face cluster*

Enhances legibility at night and offers a high-tech presentation

Cabin lamps in front

Illuminates driver's and front passenger's areas separately

Door sills

Adds a stylish look and helps protect the floor mats

Auto-tilt mirrors to aid parking*

Shift into reverse, and both outside mirrors automatically tilt downward to facilitate reversing or parking.

Privacy glass*

Keeps out prying eyes and solar glare

Battery management system

Automatically extinguishes lights the driver forgot to turn off before exiting

*186bhp Sports model only
**Automatic only
